

Kettlethulme St James' CE (VA) Primary School

Sports Funding Statement

October 2018

The purpose of the sports funding premium

The premium must be used to fund additional and sustainable improvements to the provision of PE and sport, for the benefit of primary-aged pupil, to encourage the development of healthy, active lifestyles.

Schools must use the funding to make additional and sustainable improvements to the quality of PE and sport they offer. This means that we should use the premium to:

- develop or add to the PE and sport activities that your school already offers
- make improvements now that will benefit pupils joining the school in future years

For example, the funding could be used to:

- hire qualified sports coaches to work with teachers
- provide existing staff with training or resources to help them teach PE and sport more effectively
- introduce new sports or activities and encourage more pupils to take up sport
- support and involve the least active children by running or extending school sports clubs, holiday clubs and Change4Life clubs
- run sport competitions
- increase pupils' participation in the School Games
- run sports activities with other schools

School funding statement

Event / activity	Impact on the children
Peak Active Sport 39 x 1 day additional sessions / CPD	Professional sports coaches improved all children's knowledge and skills. They were able to develop familiar sports and introduce new and unfamiliar sports. Staff CPD ensured sustainability and will benefit pupils joining the school in future years.
Andrew Mihranian 20 x 1 afterschool sessions 2013/14 2014/15 2015/16 2016/17	Professional athletics coach improved children's knowledge and skills. The coach has remained with the school to ensure continuity and sustainability. Children have had opportunities to take part in athletics competitions with children from other schools. The self-esteem and self-confidence

	of some children taking part in athletics has improved significantly.
Orienteering event	A whole school event introduced a new sport to all the children in the school. The event took place in the grounds of Lyme Park where children were able to work with an experienced coach in an appropriate environment.
Swimming coaching	It is important for children to learn to swim early as it can have a significant impact on their health. The ASA, the national governing body for swimming, published a report that looked at global health and fitness research. The evidence shows swimming may help increase your life expectancy and save your life - and that's not just by stopping you drowning! The report highlights how swimming cuts male risk of dying early by about 50% compared to runners, walkers and those who don't do any activities. It found regular swimming is also great for both sexes because it is likely to reduce heart disease, stroke and type-2 diabetes by about 535 cases in 100,000 people.
Macclesfield & district cross country	Children competed against children from other schools in events in appropriate environments.
Cheshire East Bikeability	Cycling offers independence. The 'Bikeability' course provided children with the cycling proficiency skills to enable children to ride their bikes safely.
Small schools' swimming gala	Children have the opportunity to compete in an inter-schools competition. The competition is open to schools of similar sizes so the quality of competitor is similar.
Fencing day	A professional fencing coach introduced all children to a new sport. Children were able to take part, learning new skills and developing overall sportsmanship.
Kwick Cricket 2013 2014 2015	Children competed in a tournament with local schools. Attendance at this tournament has been sustained as a result of the funding.
Archery	A professional archery coach introduced all children to a new sport. Children were able to take part, learning new skills, developing large motor skills and body-eye co-ordination.
Equipment	The school has purchased PE and sports equipment to support its provision. This supports our present children and will benefit children joining us in the future. As well as the equipment, we used the money on storage

	<p>equipment in the resource room. For the first time, all the school's PE equipment has been stored in one place and is available for use at a moment's notice. This has a substantial impact on teaching and learning as staff have access to all the resources and children will benefit from this from this point on. Some of the items we have bought are:</p> <ul style="list-style-type: none"> Kwick cricket set Lacrosse sets Bean bags Rubber mats Agility tables Large gymnastics equipment Sports kit Balls Tennis rackets
Dance Provision	<p>An after school club was provided during 2015/16.</p> <p>We enhanced the PE dance curriculum with specialist dance days for all children in the school. Dance provides creativity as well as the development of gross motor skills and co-ordination. It provided an opportunity for more children to take up an activity which has a number of health benefits.</p> <p>We employed a dancer to work with the Y6 children to support their physical development through dance and drama for the school's summer production.</p> <p>Due to the location of the school and small cohort numbers we struggled to find a dancer to provide a service for us, but have now re-established dance as an after-school club from January 2017.</p>
Tag - Rugby	<p>Rugby sessions were provided for two terms together with provision for whole school participation as part of the curriculum.</p>
PE Curriculum Consultation	<p>We invited Steve Busby into school to support the PE leader with the development of the curriculum. This CPD supports sustainability and has enabled the PE leader to support other teaching staff across the school.</p>
PE Passport & iPads	<p>Part of the PE development was to purchase ICT hardware and software to support teaching, learning and assessment in PE.</p>
EYFS Physical development	<p>A range of equipment was purchased to support the children's physical development in the Early Years. This supports sustainability and this development can be built upon in future years as the children move through the school.</p>

Large Playground Equipment	A range of large playground equipment was purchased to increase daily physical activity across the school in an effort to tackle obesity. The equipment has proved popular with all children and is used daily.
